

Company Statement: COVID – 19

The health, safety and wellbeing of our employees, customers and visitors to our sites is always our priority.

As a company we continue to closely monitor and action all current advice from both government and public health organisations.

Throughout the coronavirus COVID-19 pandemic we have been taking practical steps to ensure the safety and wellness of all people involved in the company and any people who come in to contact with our staff during site visits and installations.

Whilst we already have strict personal hygiene practices in operation, we have taken steps to keep all staff updated on current advice from the government and reinforce preventative measures in order to limit the risk of transmission.

Full risk assessments have been carried out, and robust control measures have been put in place throughout the company. COVID – 19 policy and procedures are under permanent review and are documented and communicated after any amendments are made.

Our ongoing responsibility for the health and wellbeing of our staff does not take anything away from our commitment to providing the quality service that our customers have come to expect from us. We are working closely with our customers to ensure that installations can continue in a timely, efficient and safe manner.

Company risk assessments are available on request. Site – specific risk assessments to dovetail with customers' own specific requirements can be produced wherever needed by contacting our head office.

Hayley Perry
Managing Director
